

Shawnee has joined the TerraCycle® Chip Bag Brigade

To make the best snacks on earth, Frito-Lay® understands the need to protect the earth. That is why Frito-Lay has joined with innovative eco-capitalist company TerraCycle® to provide a second life for used chip bags. Imagine a future where your chip bags won't end up in landfills! 😊 Frito-Lay has been working for years to reduce every aspect of their environmental impact, especially their packaging (learn more at www.fritolay.com).

Now, every time you enjoy any Frito-Lay chip bag you can save the bag and send it in to Shawnee. We will have a collection barrel in the cafeteria, much like the drink pouch brigade. We will ship our used chip bags into TerraCycle and they'll upcycle the bags into cool new products like a clipboard, tote bag, or trash can. To express their gratitude for our help in advancing their 'zero landfill' initiative, for each approved chip bag sent in, Shawnee will receive \$0.02.

Thank you for your support of this new green school initiative!
