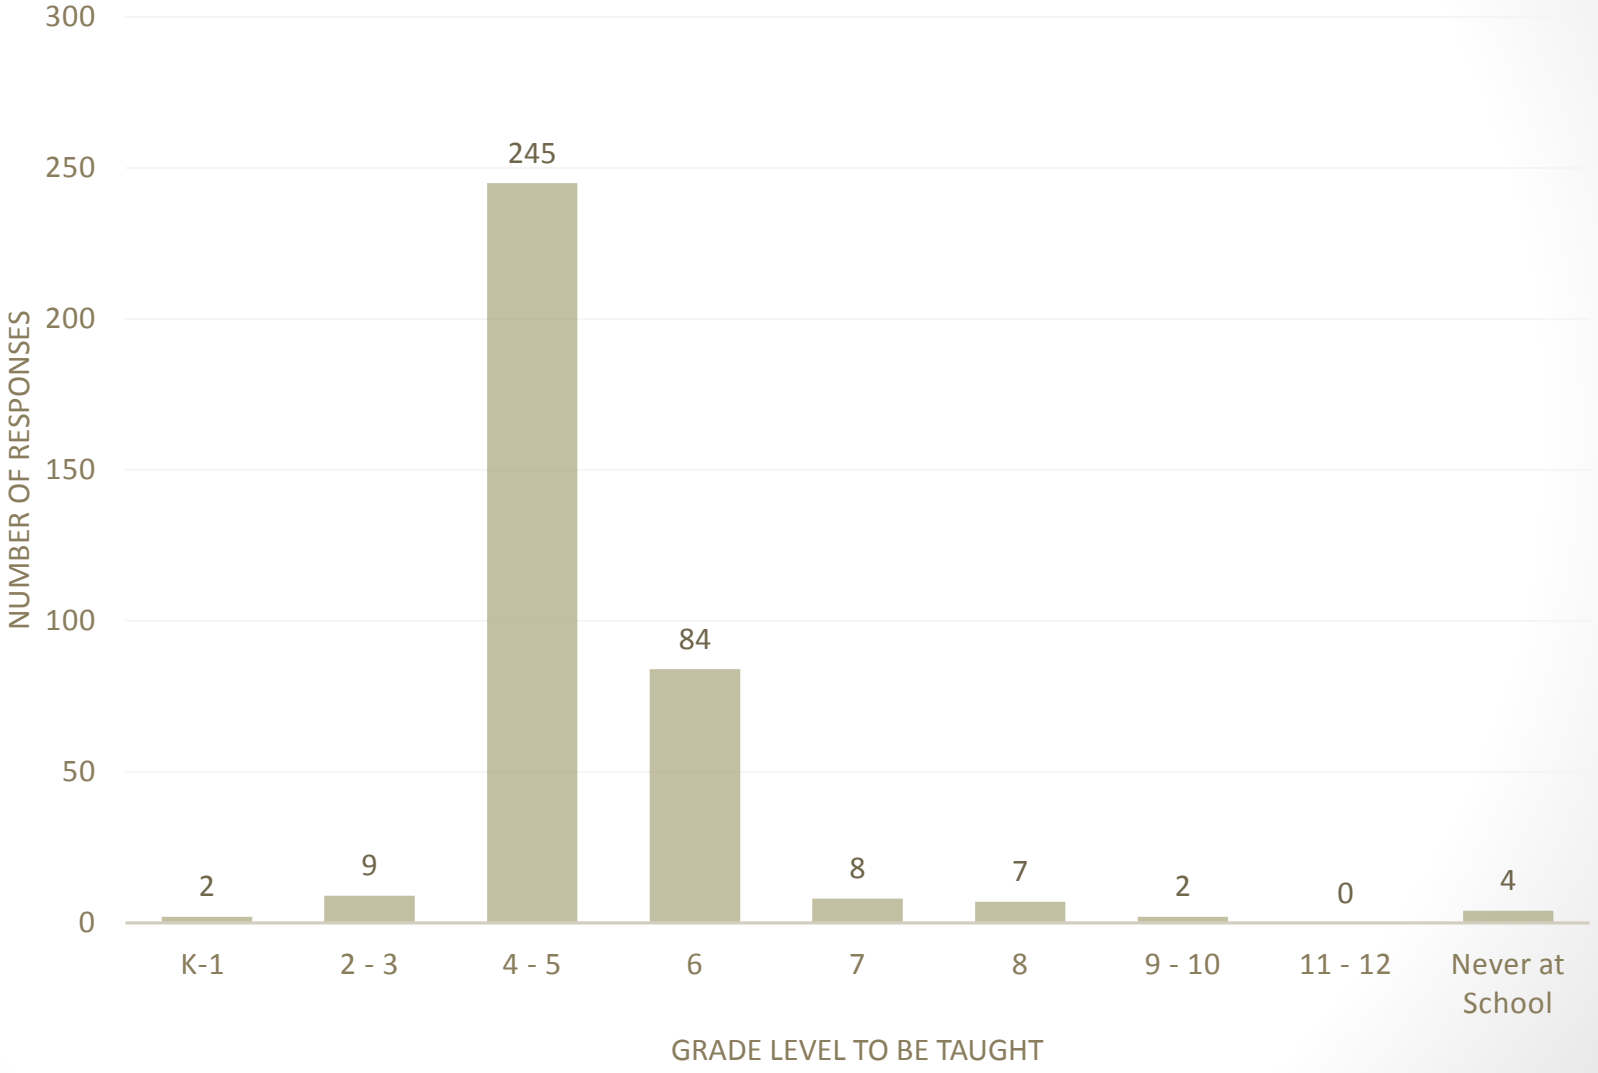
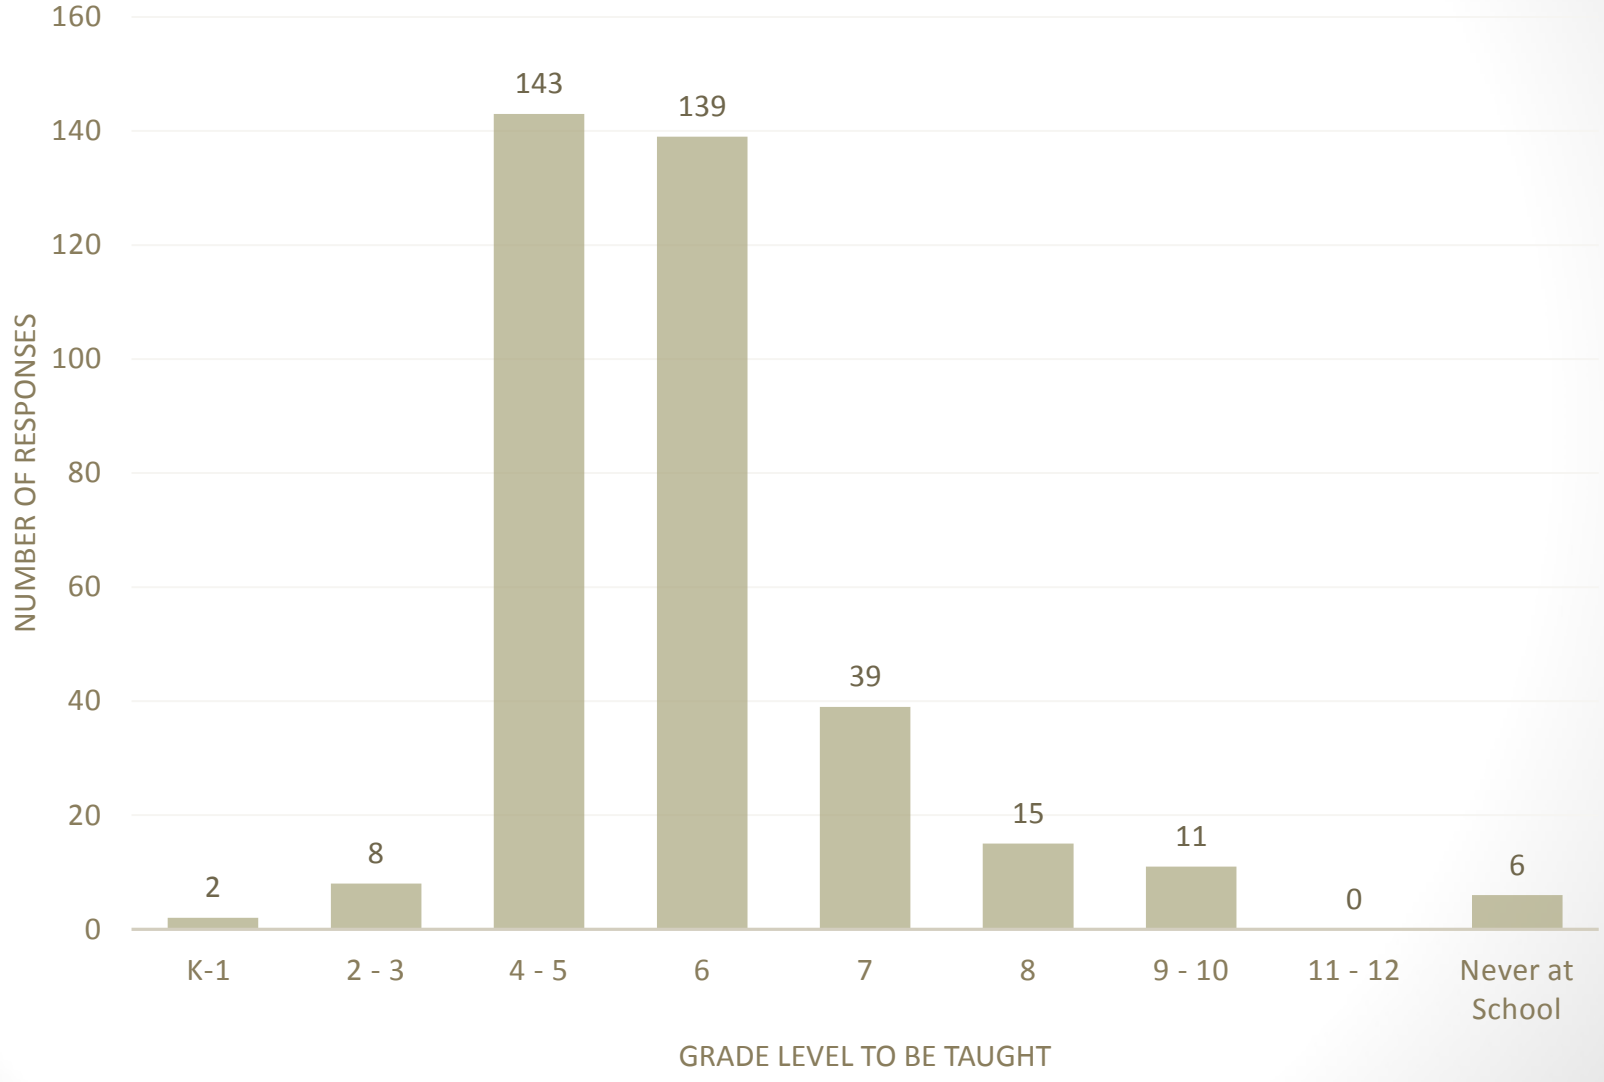
Community Survey Highlights - 2015

Chippewa Valley Schools

Puberty:
Physical and social changes associated with it and what to expect

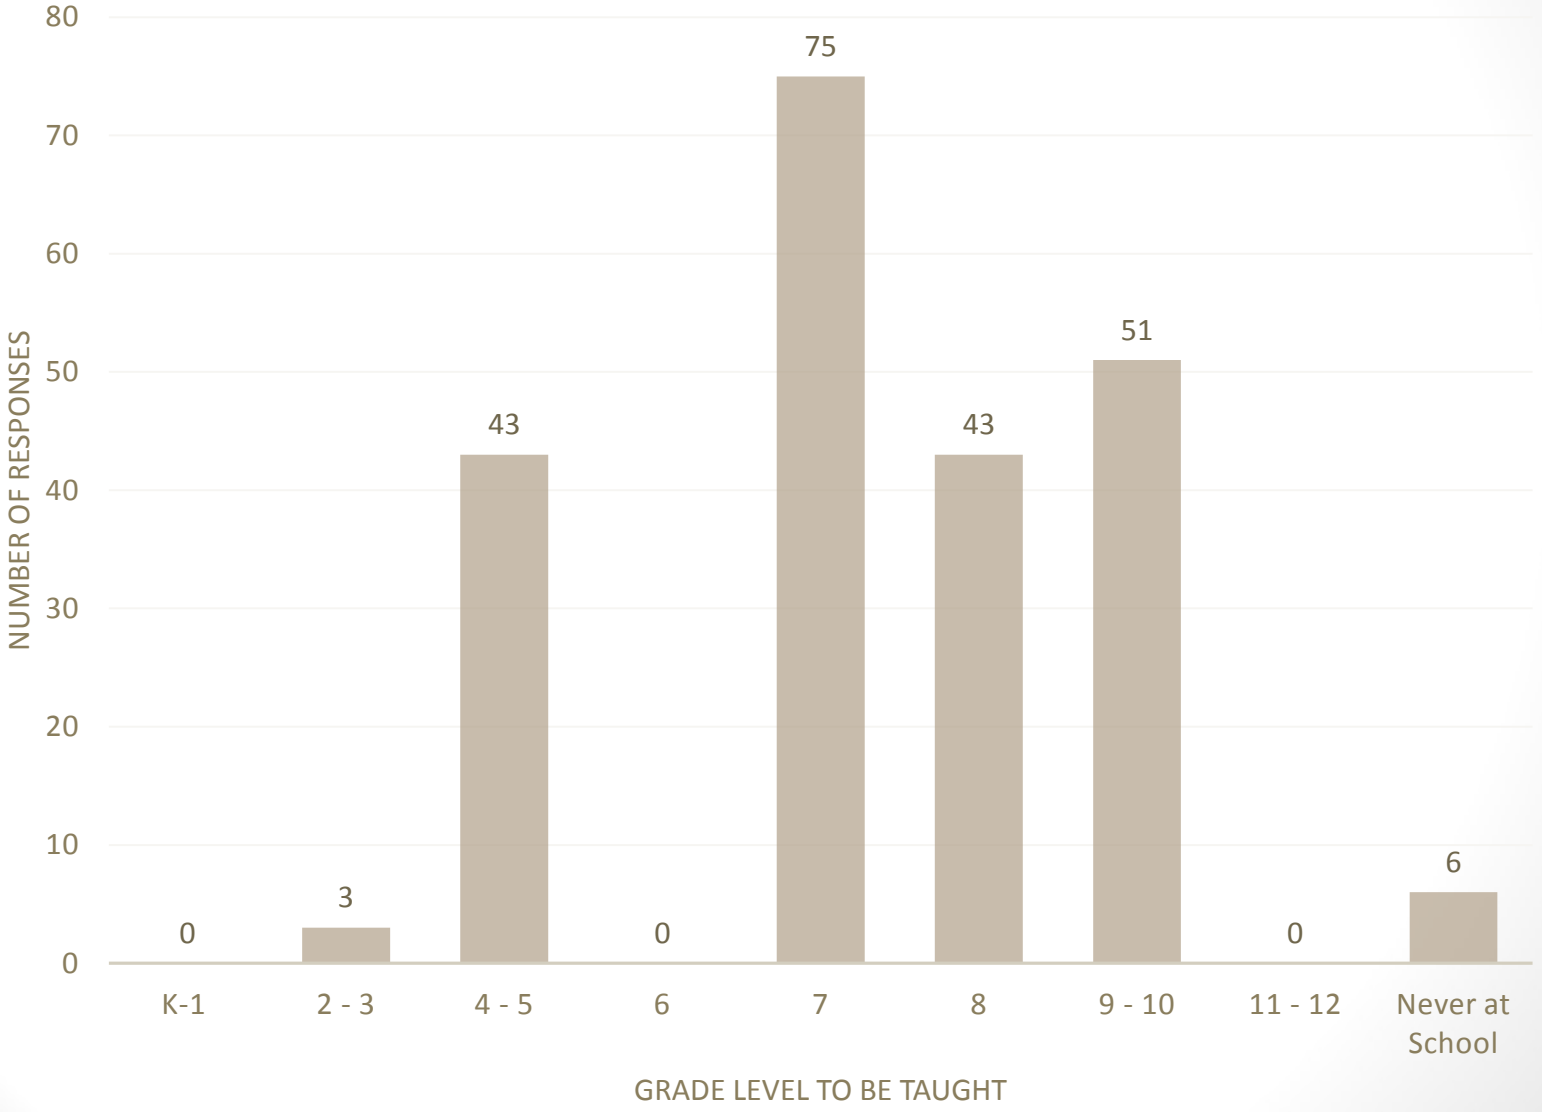


Reproductive Anatomy:
Reproductive parts of the female and male bodies and how they work

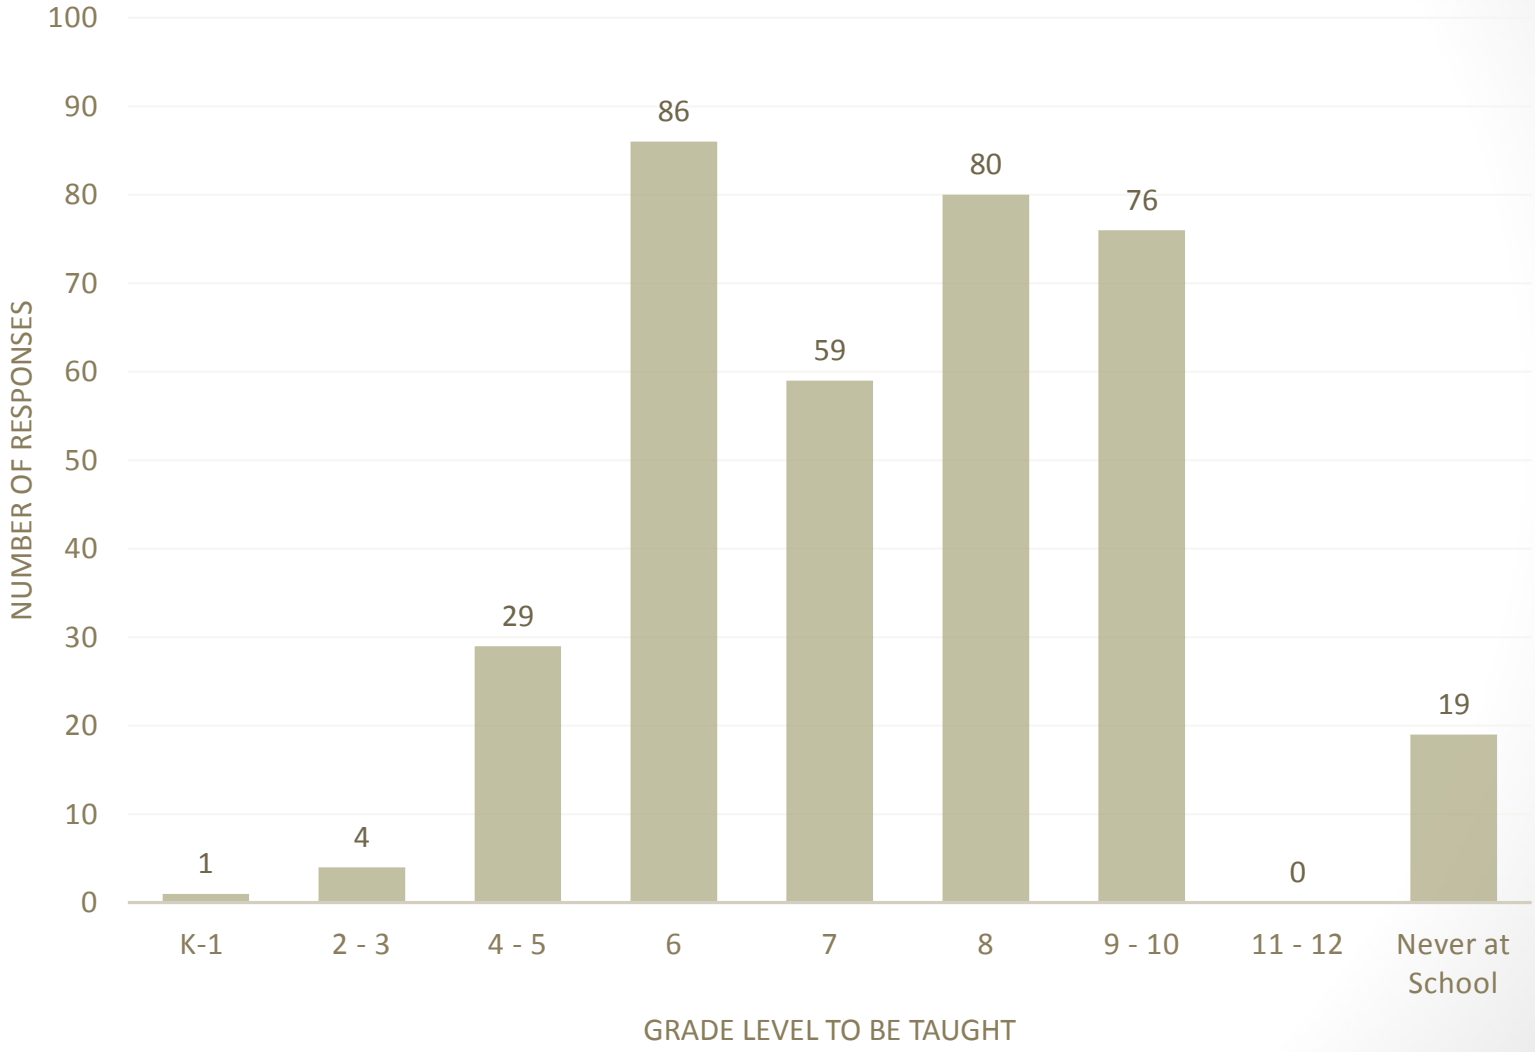


Sexually Transmitted Infections:

Transmission, symptoms, treatment, prevention of infections, such as HIV/AIDS, herpes and syphilis

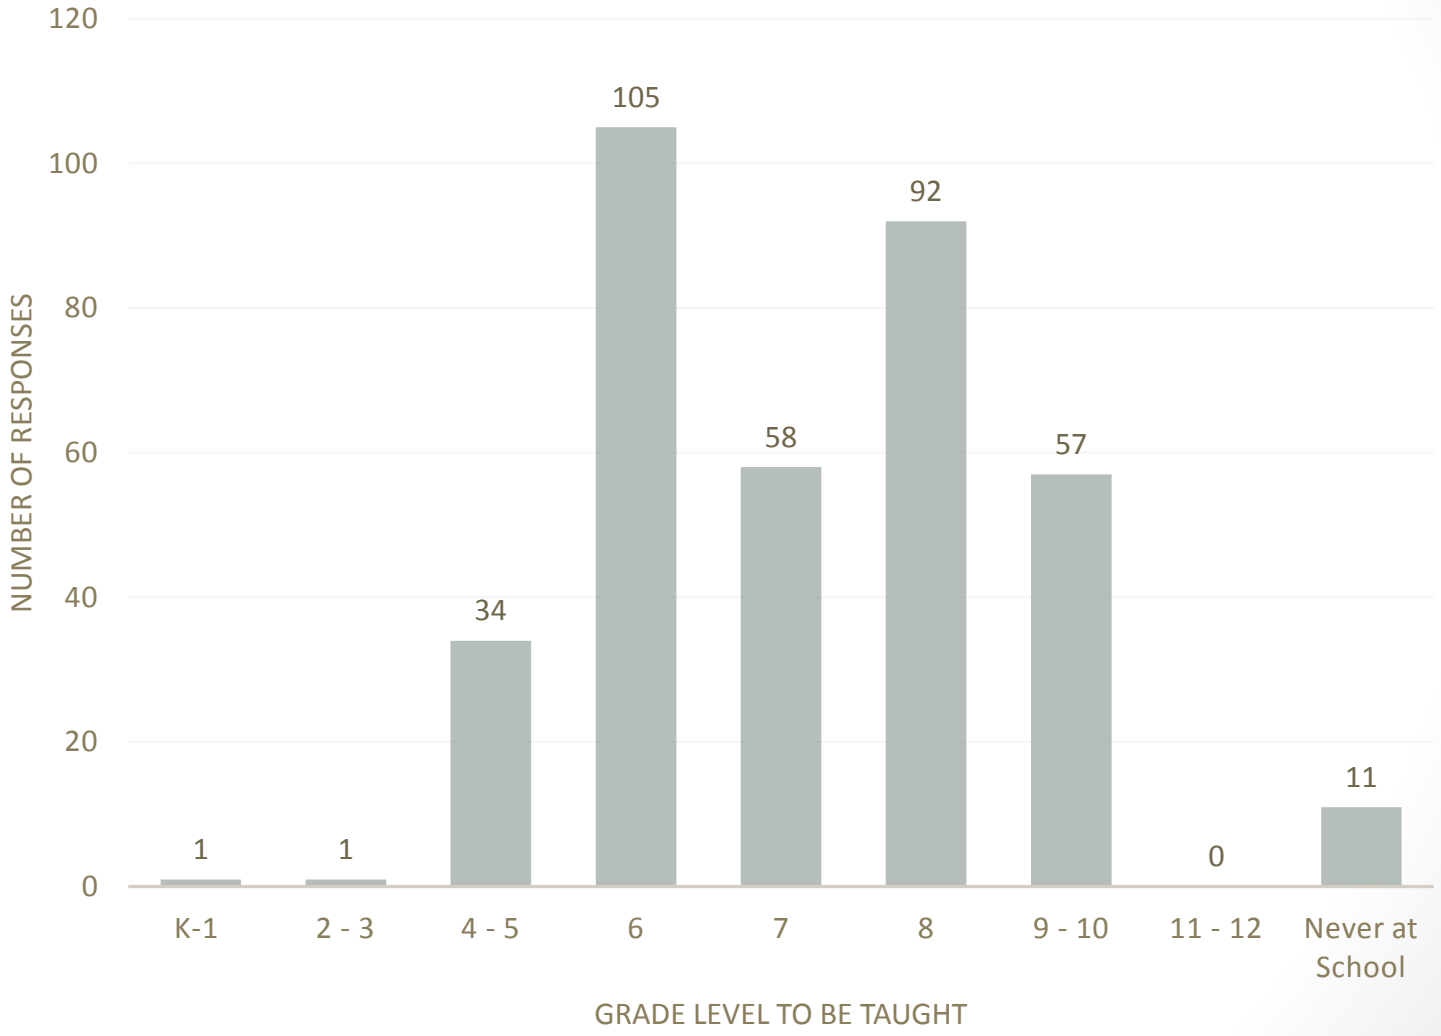


Sexual Decision-Making:
Communication, assertiveness, refusal skills, personal boundary-setting

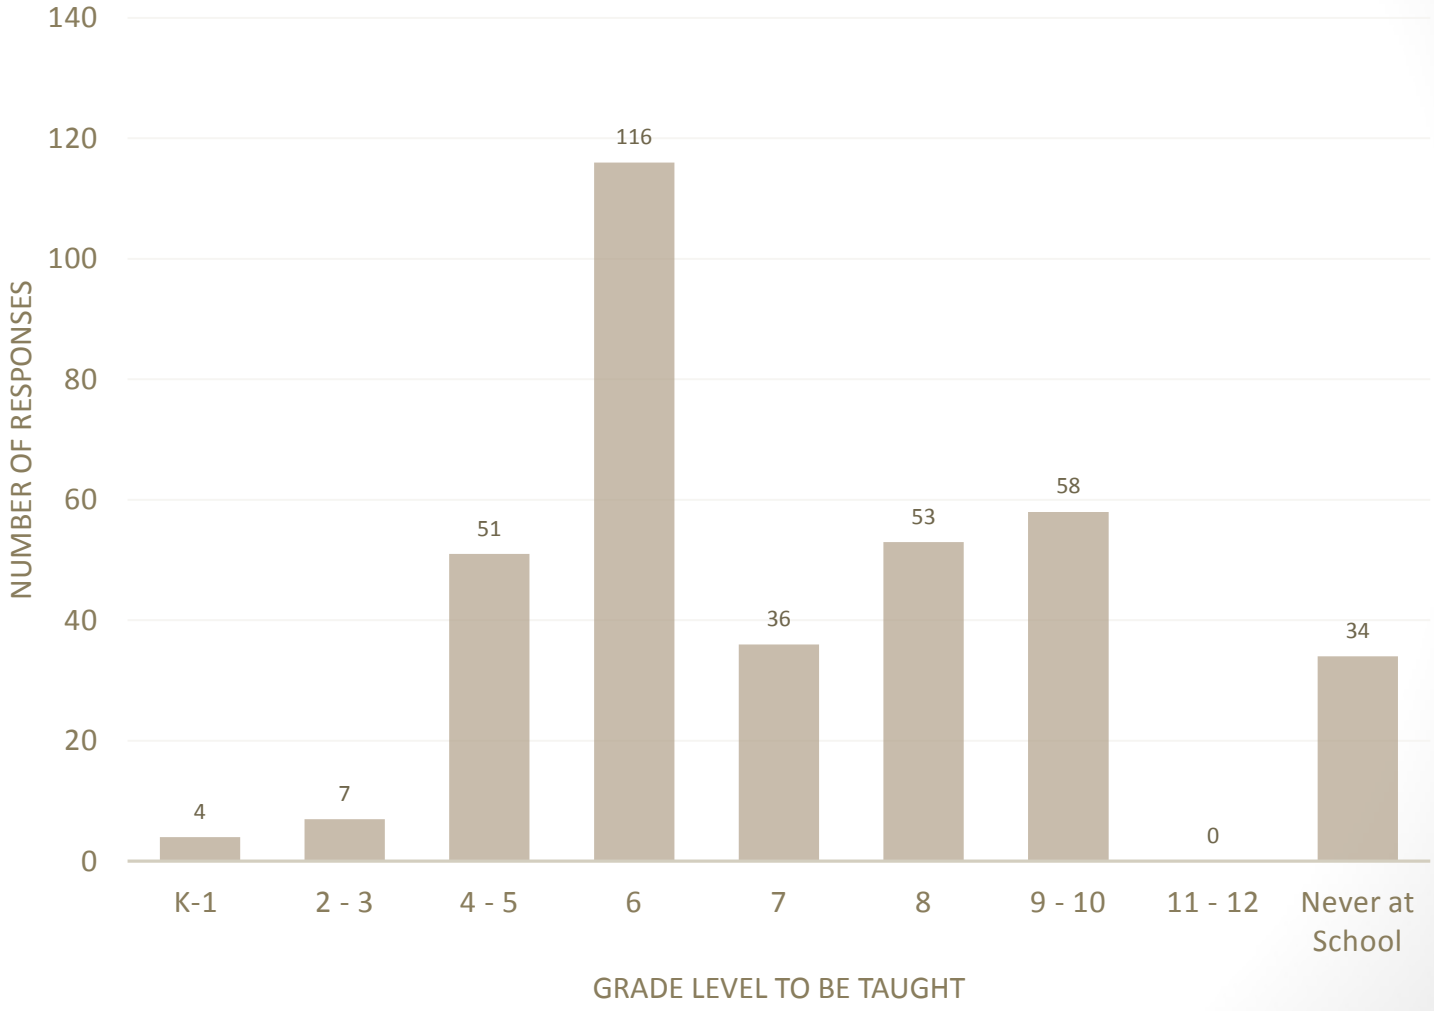


Abstinence:

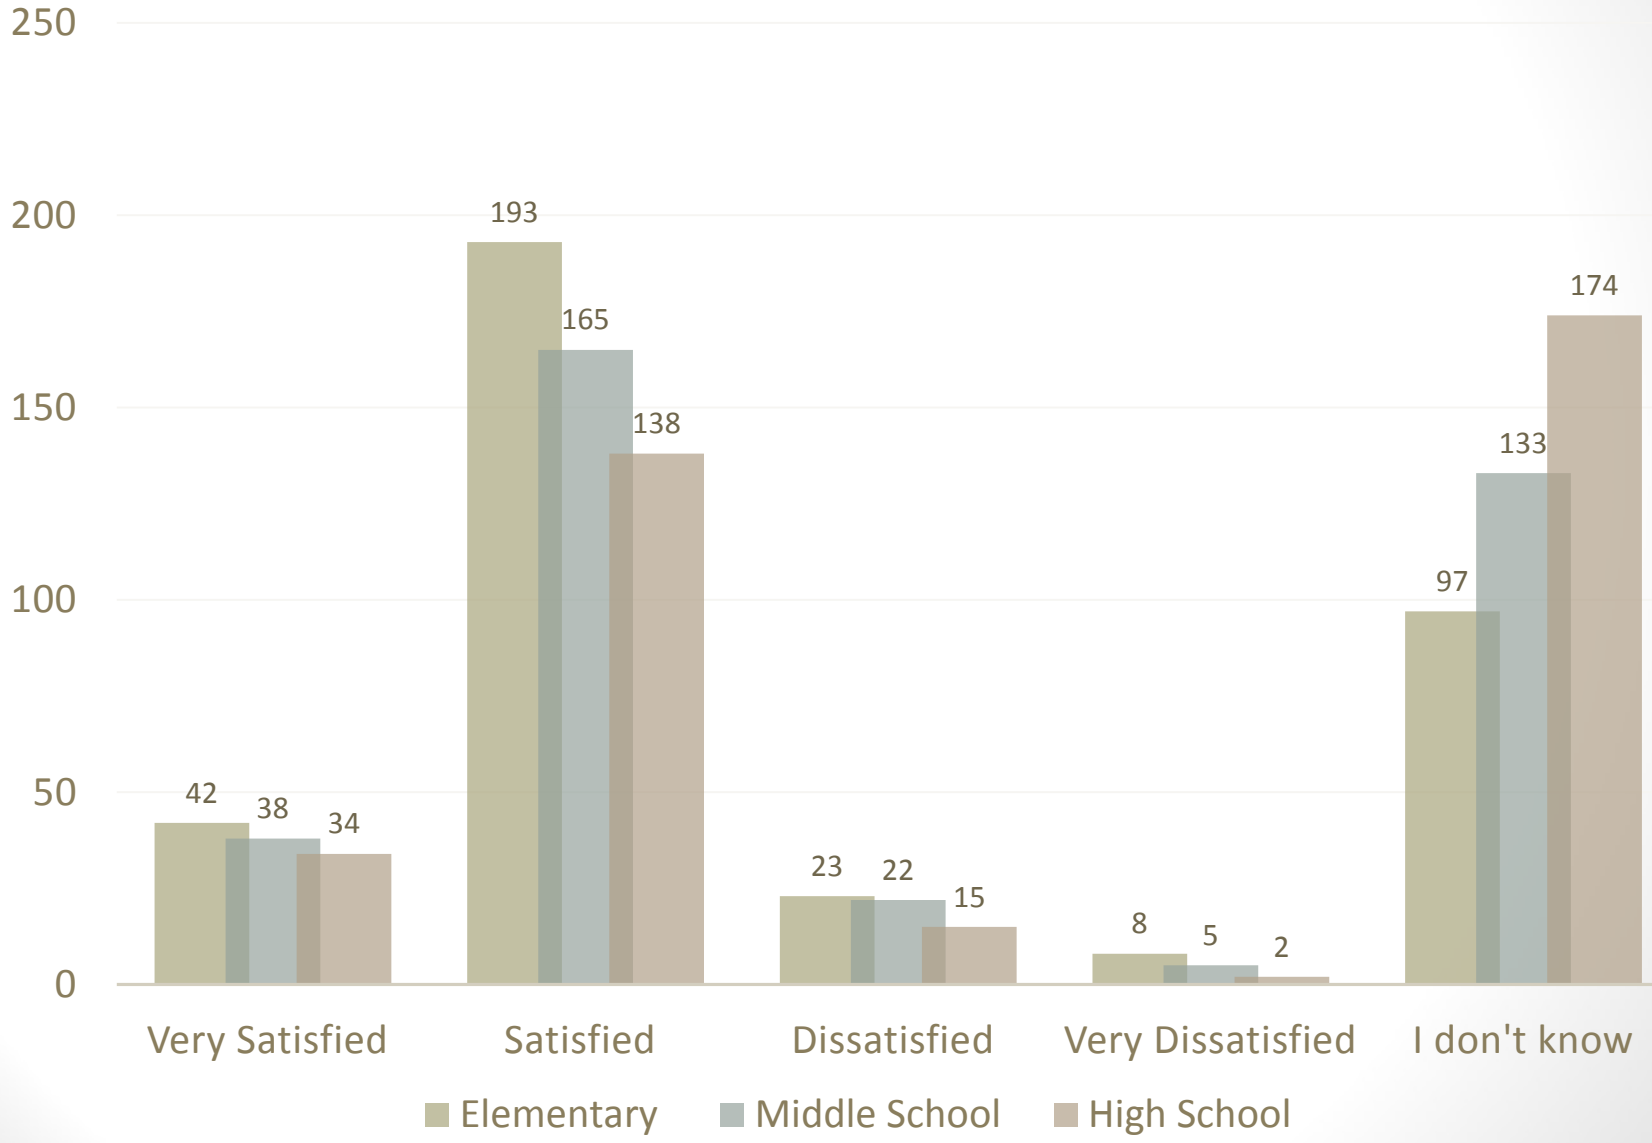
Reasons for not having sexual intercourse; developing resistance skills



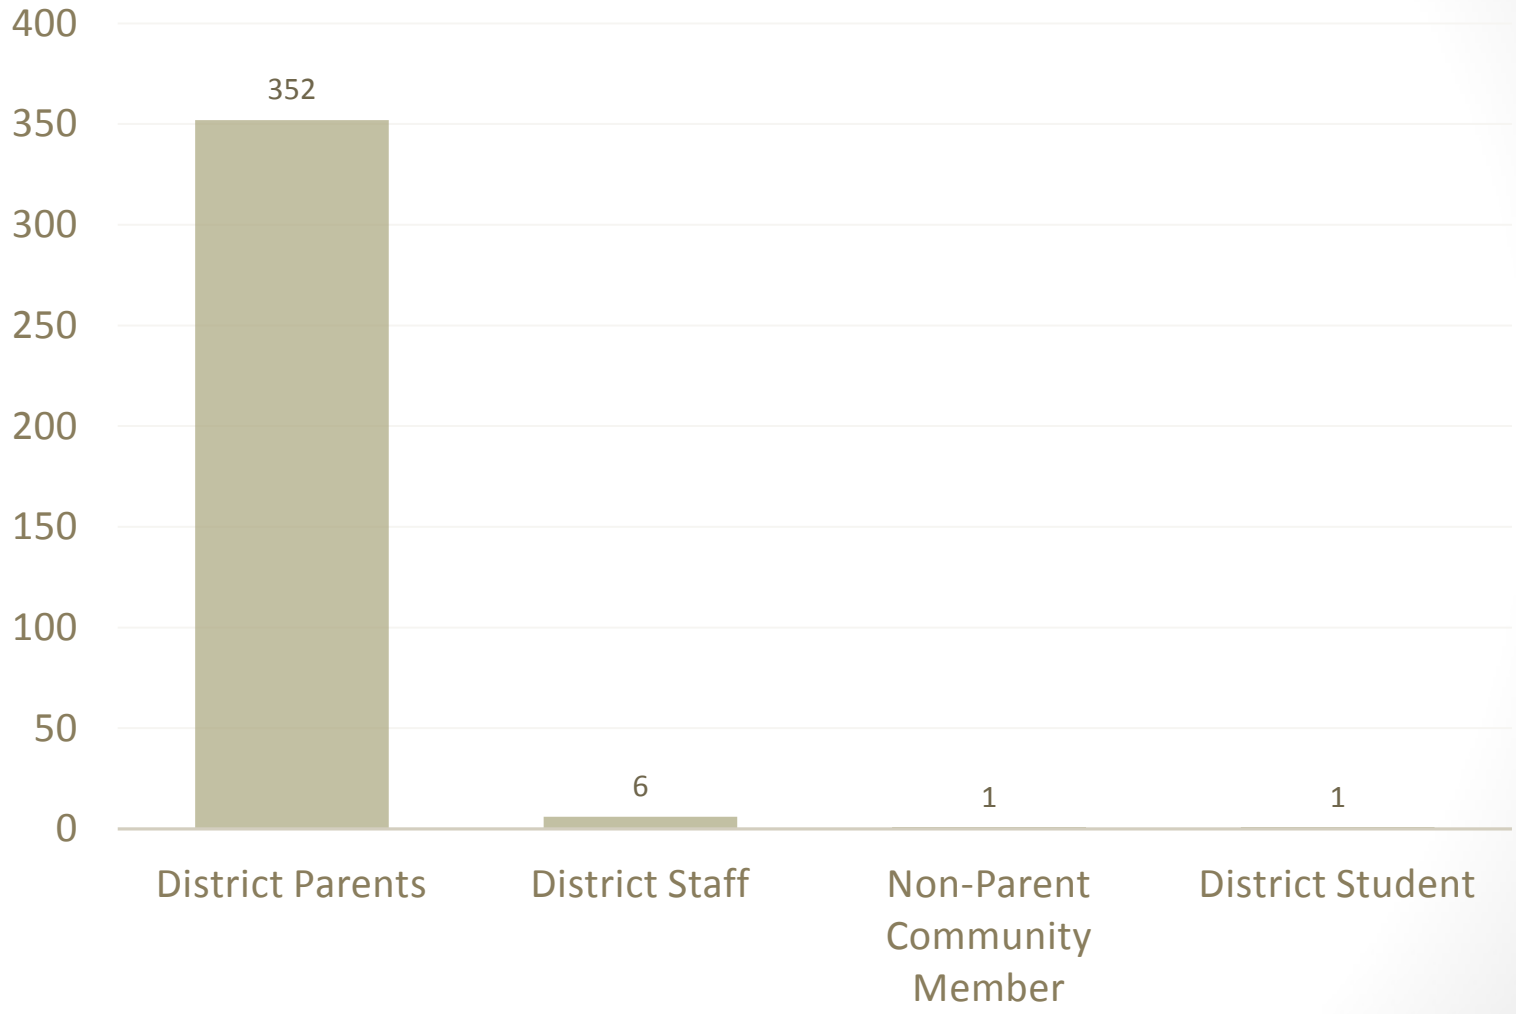
Sexual Orientation:
Terminology associated with sexual orientation, how to be respectful related to sexual orientation



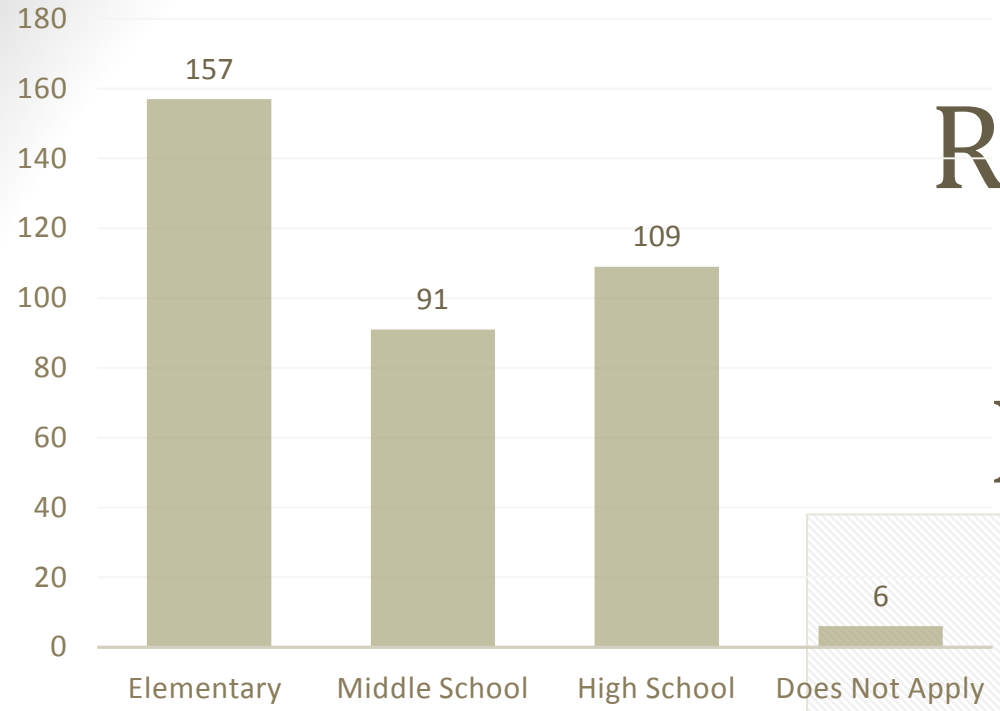
How satisfied are you with how well the current health curriculum meets the needs of the different aged students?

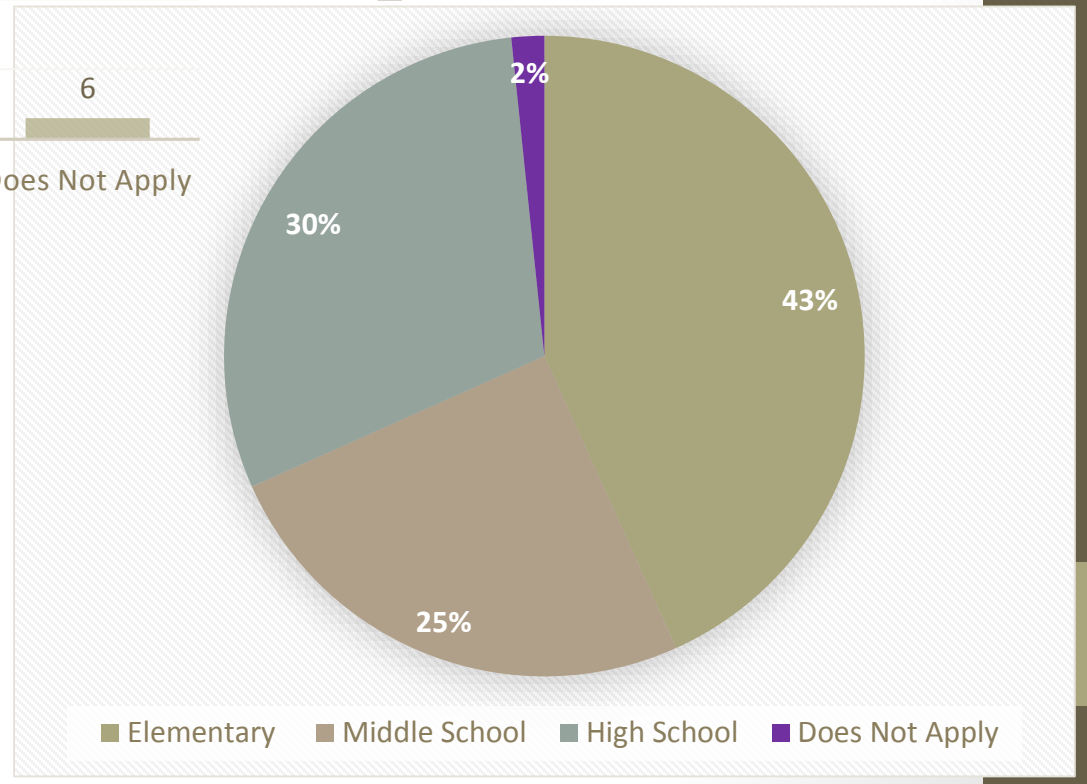


Respondents



Level Representation from Respondents





Exciting Things Ahead

- Continue to work on ensuring that the same concepts are being taught at each level for Reproductive Health and HIV
- Use the data from the community survey to create and disseminate reproductive health materials for parent newsletters and website
- Provide teachers with a guide for how to answer student questions (Working with Michigan Department of Education now to finalize this document)
- Fill empty spots on the Advisory Board

Exciting Things Ahead

Chippewa Valley Schools Reproductive Health Education program will strive to provide the most up to date and outcomes oriented curriculum for students in order to assist them in making the healthiest choices possible for their future.
