Plan your future ...

BE PROACTIVE

*I am the force.*

*Take responsibility for your life.*

Being proactive is more than taking initiative. It is accepting responsibility for our own behavior (past, present, and future) and making choices based on principles and values rather than on moods or circumstances. Proactive people are agents of change and choose not to be victims, to be reactive, or to blame others. They take an Inside-Outside Approach to creating changes.
Plan your future ...

BEGIN WITH THE END IN MIND

_Control your own destiny or someone else will._

Define your mission and goals in life.

All things are created twice – first mentally, second physically. Individuals, families, teams, and organizations shape their own future by creating a mental vision and purpose for any project. They don’t just live day to day without a clear purpose in mind. They mentally identify and commit themselves to the principles, values, relationships, and purposes that matter most to them.
PUT FIRST THINGS FIRST

Will and Won’t Power

Prioritize, and do the most important things first

Putting first things first is the second or physical creation. It is organizing and executing around mental creation (your purpose, vision, values, and most important priorities.) The main thing is to keep the main thing the main thing.
What is YOUR Mindset?

“Failure is the limit of my abilities”

**FIXED MINDSET**

“I'm either good at it or I'm not”
“My abilities are unchanging”

“I don't like to be challenged”
“I can either do it, or I can't”

“My potential is predetermined”

“When I'm frustrated, I give up”

“Feedback and criticism are personal”
“I stick to what I know”
What is YOUR Mindset?

“Failure is an opportunity to grow”

GROWTH MINDSET

“I can learn to do anything I want”

“Challenges help me to grow”

“My effort and attitude determine my abilities”

“Feedback is constructive”

“I am inspired by the success of others”

“I like to try new things”

NOTICE.....ACT

Talking to someone about suicidal feelings CANNOT cause them to attempt suicide.
In fact,

In almost 70% of all suicides the person told someone their intentions at least **ONE** hour before.

Why didn’t that person say anything about what they had been told?

Juul CEO tells teens ‘don’t vape’ amid probes into marketing practices

By Hannah Sparks

August 30, 2019 | 12:25am | Updated

E-cigarette manufacturer Juul Labs Inc. — a company worth $38 billion — is telling some of its core consumers to stop using its products.

Juul CEO Kevin Burns said, “Don’t vape. Don’t use Juul,” Thursday in a “CBS This Morning” interview.

“Don’t start using nicotine if you don’t have a pre-existing relationship with nicotine,” Burns said. “Don’t use the product. You’re not our target consumer.”

Critics, however, argue the rapidly expanding company actually went to great lengths to “convey its messaging directly to teenage children” — spending more than $200,000 on marketing and sponsorships targeted at young people as well as recruiting online influencers, according to a July congressional report.
'I'm sorry': Juul CEO issues public apology to parents of teens addicted to the company's vaping products

Business Insider, July 16, 2019

Burns delivered that message in a new documentary, after CNBC's Carl Quintanilla asked Burns what he would say to a parent of a child addicted to e-cigarettes.

"First of all, I'd tell them that I'm sorry that their child's using the product," Burns said. "It's not intended for them. I hope there was nothing that we did that made it appealing to them. As a parent of a 16-year-old, I'm sorry for them, and I have empathy for them, in terms of what the challenges they're going through."

Cell phones

• Procedures and expectations remain the same
• Classrooms are RED unless teacher provides direction otherwise

Develop and practice how to effectively manage strong feelings and impulses
But the issues related to cell phones are bigger than school policies, red classrooms, etc ...

From Health.com on the “Anxiety” link … by Sarah Karnasiewicz in a review of the book, How to Break Up With Your Phone

7. There's a good reason tech innovators don't let their kids have devices

When you're a parent, reckoning with your own negative cell-phone behaviors feels bad—but watching the same habits infect your kids is even worse. That's probably why, as Price points out, when it comes to their personal lives, many of the leading innovators in digital technology have chosen to shield their own families from the devices for as long as possible. Consider this: Steve Jobs didn't let his kids use the iPad. And Bill and Melinda Gates did not let their children have phones until they were 14.

But the issues related to cell phones are bigger than school policies, red classrooms, etc ...

From sciencedaily.com summarizing research findings related to social media, depression and loneliness:

The link between the two has been talked about for years, but a causal connection had never been proven. For the first time, University of Pennsylvania research based on experimental data connects Facebook, Snapchat, and Instagram use to decreased well-being. Psychologist Melissa G. Hunt published her findings in the December Journal of Social and Clinical Psychology.

We will be looking to engage students, staff, parents and others in thoughtfully examining our approach to cell phones while continuing to educate on how digital and social media is impacting our students and school culture ...
