

Remember, you can save water

Save water

When we over water our lawns, **the excess water carries pollution into storm drains and ditches that lead directly to our rivers and lakes.**

In fact, did you know that each of us uses 77 gallons of water a day?

What can you do? Simple.

Treat water as a valued resource. **Water when necessary** instead of on a fixed schedule. **Use a broom instead of a hose** to clean sidewalks and driveways. **Direct hoses and sprinklers on the lawn**, not the driveway. And, **saving water saves you money.**
